Wafer Creaming Machine CR Series - CR - 5 SH (Single Head)

Better by Design...

AUTOMATIC WAFER SPREADING MACHINE TYPE CR5 SH

The CR5 SH machine can spread cream and put together to make wafer blocks. The desired quantity of the cream layers can be adjusted by means of a counting device.

A stacking device puts the spread sheets together to make a wafer block. The machine has a spreading unit which operates using a contact system.

The spreading rollers are heated by electricity and the heating is accurately adjustable. The number of revolutions made by the spreading rollers as well as the speed of conveyor belt are infinitely variable and independent of each other.

Technical Details	
Size of wafer sheets	290 X 460 mm
Wafer Sheets (per minute)	285 mm
Wafer Sheets per minute (Max.)	18 Max.
Electrical Load (Kw)	2.5

Dimensions of machine (apprx. mm)

Length	2900
Width	650
Height	1400
Net Weight (appr. Kg.)	650
Net Export Packing (Kg.) (Bare Essential)	900
Shipping space (apprx.M ³)	3.0

WAFER CREAMING METHODS

1. Film method 2. Reverse film method 3. Contact method 4. Film method for hollow wafers

*Modifications Reserved

We are constantly guided by our principle of offering our customers better and better machines; to give increased efficiency and higher levels of automation. The technical data and illustrations are subject to change without notice
